

Contact

This flyer outlines our experience, services and working methods. We invite you to read more about us and our projects on our websites. However, we would prefer of course to inform you in a personal interview, which would allow us to explain our approach and methods more comprehensively. Send us an email or call one of the numbers below in order to make an appointment.

Project GrasGoed

In this Interreg Cross-Border project (duration 2017-2020), nature organizations, innovative companies and research institutes collaborate to exploit natural grass. To enable the exploitation of natural grass, which in this project is coming from the border region, moving and transporting machines are adjusted and machines for processing are being further developed. Ultimately, the entire project results in a number of concrete business cases for products such as grass paper, insulation material, food for the livestock industry and fertilizers for sports facilities. The project was initiated by us, after which partners were sought and a subsidy application was written. Since the approval of this application, we have been supporting the partnership with its execution. The number of partners is 11. Natuurpunt from BE is LP; the budget is € 5.4 million; grant amount is € 2.7 million.

See www.grasgoed.eu

Some other projects are:

Interreg Grensregio project: Grenzeloos Biobased Onderwijs; see www.biobasedonderwijs.eu

Interreg NWE-project: Carbon Reduction in Peatlands; see www.nweurope.eu/care-peat

Interreg 2 Seas-project: Implementation of Ship Hybridisation; see www.ishy.eu

Project PECS

In this Interreg 2 Seas project (duration 2017-2020), ports, companies and research institutes collaborate to reduce CO2 emissions in ports. To this end, methodologies are being developed that ports can use to analyse and reduce their energy consumption and to explore the usage of renewable energy. In addition, new technologies are being tested, such as small wind turbines, floating solar panels, energy pontoons and a local energy platform. Besides concrete business cases for these technologies, the ports make plans to significantly reduce their CO2 emissions by 25% in 2025. We initiated the project, brought the partnership together and wrote the subsidy application. We are currently supporting the partnership with the project's implementation. The number of partners is 10. The Port of Ostend is Lead Partner, the budget is € 8 million; grant amount is approximately € 4 million.

EXPERIENCED CONSULTANTS EU GRANTS

**Two advisors with 20 years of experience:
A strong team developing and managing
EU applications and projects.**

A successful team

Wiljan van Laarhoven and Wim van Hooff (Promint Project Management and Project and Consultancy Office Wim van Hooff) have been collaborating for 20 years on EU projects and grants, and provide a successful service in developing and managing EU applications and projects.

As a result of experience, we have developed a clear understanding of how to identify and formulate projects as well as assess them for their potential feasibility. As a result, we are able to advise and assist our clients in the best possible way.

TeamEU

In the coming years we aim to further expand our services under the name TeamEU. This international team will, in addition to us, consist of thematic, financial and communication experts who all have a lot of experience with EU subsidies. Experts who will join TeamEU are Anthony Gallagher (United Kingdom) and Simona Margarino (Germany).

See www.TeamEU.eu

Services

We offer the following services:

Grant advice:

Acting as an “internal advisor” in the area of grants. We provide organizations with periodic advice on current grant options.

Subsidy scans:

Analysing projects and advising on the (EU) grant and funding opportunities for an organisation and / or project.

Writing applications:

Developing project ideas and preparing and / or supervising complete grant applications.

Project management:

Monitoring the implementation process (including content, finances, cooperation etc.) after grant approval, including preparation of (periodic) claims and reports.

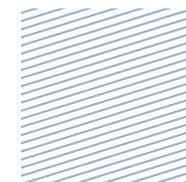

Masterclasses and courses:

from 2020 onwards, organising and giving courses and workshops for European subsidy recruitment in the new programming period 2021-2027. You can register individually, but we also provide “in-house” courses and workshops.

Way of working

Characteristics of the way we work are a committed attitude, and a willingness to innovate and engage creatively with a subject. To deliver a strong project with a clear focus, we always carry out detailed research involving external expertise. We structure our projects systematically so that they comply with the requirements of the particular EU program and clearly address the guidelines of the application procedure.

Not only knowledge and creativity are essential for a successful application, but also commitment and tenacity, from the very beginning of a project up until its completion. We are serious and highly committed and our numerous clients appreciate this highly.

Our method

For the preparation and supervision of a grant application, we have developed a method that is simple and transparent for all organizations involved. Depending on the grant application, one or more of the following phases will be executed: ideation and development phase, partner research phase, (preliminary) application phase and management phase.
